

AMENDMENTS TO THE SPECIFICATION

Paragraph at page 6, lines 3-10:

When compared with the arrangement of a plurality of LED lamps as known in the prior art, the incorporation of a plurality of LED chips 22a into an LED array 22 in this way enables a larger number of LED chips 22 22a to be disposed in the same surface area and enables the quantity of light to be increased. In addition, as the present invention allows the LED array 22 to be positioned over the full length of the side surface 21a of the light source holder 21, further increases of quantity of light are made possible.
